CONTENTS OF VOLUME 49

Number 1

M. KACHANOV, I. SEVOSTIANOV and B. SHAFIRO	1	Explicit cross-property correlations for porous materials with anisotropic microstructures
P.D. ZAVATTIERI, P.V. RAGHURAM and H.D. ESPINOSA	27	A computational model of ceramic microstructures subjected to multi-axial dynamic loading
J. ZEMAN and M. ŠEJNOHA	69	Numerical evaluation of effective elastic properties of graphite fiber tow impregnated by polymer matrix
B. YANG and K. RAVI-CHANDAR	91	Crack path instabilities in a quenched glass plate
A.M. BALK, A.V. CHERKAEV and L.I. SLEPYAN	131	Dynamics of chains with non-monotone stress–strain relations. I. Model and numerical experiments
A.M. BALK, A.V. CHERKAEV and L.I. SLEPYAN	149	Dynamics of chains with non-monotone stress–strain relations. II. Nonlinear waves and waves of phase transition
P. YU and K.S. HAVNER	173	Numerical studies of nonuniform deformation, stress state evolution, and subgrain formation in bicrystals in (110) channel die compression

Number 2

H. CHAI	209	Contact buckling and postbuckling of thin rectangular plates
C. CHEN, N.A. FLECK and T.J. LU	231	The mode I crack growth resistance of metallic foams
H.Y. YU	261	Two-dimensional elastic defects in orthotropic bicrystals

H. TSAI and P. ROSAKIS	289	Quasi-steady growth of twins under stress
M.V. NEBOZHYN, P. GILORMINI and P.P. CASTAÑEDA	313	Variational self-consistent estimates for cubic viscoplastic polycrystals: the effects of grain anisotropy and shape
K. RANJITH and J.R. RICE	341	Slip dynamics at an interface between dissimilar materials
X.K. ZHU and Y.J. CHAO	363	Constraint effects on crack-tip fields in elastic-perfectly plastic materials
L.R.F. ROSE and C.H. WANG	401	Self-similar analysis of plasticity-induced closure of small fatigue cracks
R. LUCIANO and J.R. WILLIS	431	Non-local constitutive response of a random laminate subjected to configuration-dependent body force

Number 3

P. DEWHURST	445	Analytical solutions and numerical procedures for minimum-weight Michell structures
L.I. SLEPYAN	469	Feeding and dissipative waves in fracture and phase transition I. Some 1D structures and a square-cell lattice
L.I. SLEPYAN	513	Feeding and dissipative waves in fracture and phase transition II. Phase-transition waves
L.J. WALPOLE	551	An elastic singularity in a bounded region: volume change and related effects
P.H. GEUBELLE and D.V. KUBAIR	571	Intersonic crack propagation in homogeneous media under shear-dominated loading: numerical analysis
H. GARMESTANI, S. LIN, B.L. ADAMS and S. AHZI	589	Statistical continuum theory for large plastic deformation of polycrystalline materials
P.E.W. LABOSSIERE and M.L. DUNN	609	Fracture initiation at three-dimensional bimaterial interface corners
L.L. FISCHER and G.E. BELTZ	635	The effect of crack blunting on the competition between dislocation nucleation and cleavage
M. JIANG, M. OSTOJA-STARZEWSKI and I. JASIUK	655	Scale-dependent bounds on effective elastoplastic response of random composites
C. HUET	675	Extended Clapeyron formulae for viscoelasticity problems in the time domain and application to the boundary-condition effect in random composite bodies

B. KAUSHIK and G. DOLZMANN 707 Erratum

Number 4

P. THAMBURAJA and L. ANAND 709 Polycrystalline shape-memory materials: effect of crystallographic texture

R.J. HENDERSON, H.W. CHANDLER, A.R. AKISANYA, C.M. CHANDLER and S.A. NIXON 739 Micro-mechanical modelling of powder compaction

A. ACHARYA 761 A model of crystal plasticity based on the theory of continuously distributed dislocations

J.E. HUBER and N.A. FLECK 785 Multi-axial electrical switching of a ferroelectric: theory versus experiment

D. BERNARDINI 813 On the macroscopic free energy functions for shape memory alloys

M. BRUN, A. CARINI and F. GENNA 839 On the construction of extended problems and related functionals for general nonlinear equations

H.X. ZHU, J.R. HOBDELL and A.H. WINDLE 857 Effects of cell irregularity on the elastic properties of 2D Voronoi honeycombs

J.C. CRISCIONE, A.S. DOUGLAS and W.C. HUNTER 871 Physically based strain invariant set for materials exhibiting transversely isotropic behavior

G.H. GOLDSZTEIN 899 The effective energy and laminated microstructures in martensitic phase transformations

C.C. FULTON and H. GAO 927 Effect of local polarization switching on piezoelectric fracture

Number 5

H. KESSLER and H. BALKE 953 On the local and average energy release in polarization switching phenomena

H. JIANG, Y. HUANG, Z. ZHUANG and K.C. HWANG 979 Fracture in mechanism-based strain gradient plasticity

B. LORET and E. RADI 995 The effects of inertia on crack growth in poroelastic fluid-saturated media

G. SCHILTGES and J. DUAL 1021 Failure behaviour of microstructures under torsional loads

K.M. LIECHTI and J.-D. WU	1039	Mixed-mode, time-dependent rubber/metal debonding
M.C. BOYCE, K. KEAR, S. SOCRATE and K. SHAW	1073	Deformation of thermoplastic vulcanizates
J.W. KYSAR	1099	Continuum simulations of directional dependence of crack growth along a copper/sapphire bicrystal interface. Part I: experiments and crystal plasticity background
J.W. KYSAR	1129	Continuum simulations of directional dependence of crack growth along a copper/sapphire bicrystal interface. Part II: crack tip stress/deformation analysis
P.A. MARTIN and J.R. BERGER	1155	Waves in wood: free vibrations of a wooden pole
A. MENZEL and P. STEINMANN	1179	Erratum

Number 6

W.J. DRUGAN	1181	Dynamic fragmentation of brittle materials: analytical mechanics-based models
K. GARIKIPATI, L. BASSMAN and M. DEAL	1209	A lattice-based micromechanical continuum formulation for stress-driven mass transport in polycrystalline solids
M. KURODA and V. TVERGAARD	1239	A phenomenological plasticity model with non-normality effects representing observations in crystal plasticity
C.Q. RU	1265	Axially compressed buckling of a doublewalled carbon nanotube embedded in an elastic medium
M. AHMER WADEE and A. BLACKMORE	1281	Delamination from localized instabilities in compression sandwich panels
J. TIROSH and S. PELES	1301	Bounds on the fatigue threshold in metals
M.C. BOYCE, S. SOCRATE, K. KEAR, O. YEH and K. SHAW	1323	Micromechanisms of deformation and recovery in thermoplastic vulcanizates
M.C. BOYCE, O. YEH, S. SOCRATE, K. KEAR and K. SHAW	1343	Micromechanics of cyclic softening in thermoplastic vulcanizates
J.Y. SHU, N.A. FLECK, E. VAN DER GIESSEN and A. NEEDLEMAN	1361	Boundary layers in constrained plastic flow: comparison of nonlocal and discrete dislocation plasticity

Number 7

V. LAZARUS, J.-B. LEBLOND and S.-E. MOUCHRIF	1399	Crack front rotation and segmentation in mixed mode I + III or I + II + III. Part I: Calculation of stress intensity factors
V. LAZARUS, J.-B. LEBLOND and S.-E. MOUCHRIF	1421	Crack front rotation and segmentation in mixed mode I + III or I + II + III. Part II: Comparison with experiments
R. GUINOVART-DÍAZ, J. BRAVO-CASTILLERO, R. RODRÍGUEZ-RAMOS and F.J. SABINA	1445	Closed-form expressions for the effective coefficients of fibre-reinforced composite with transversely isotropic constituents. I: Elastic and hexagonal symmetry
F.J. SABINA, R. RODRÍGUEZ-RAMOS, J. BRAVO-CASTILLERO and R. GUINOVART-DÍAZ	1463	Closed-form expressions for the effective coefficients of a fibre-reinforced composite with transversely isotropic constituents. II: Piezoelectric and hexagonal symmetry
P.A. MARTIN	1481	On wrinkled penny-shaped cracks
A. MOLINARI and S. MERCIER	1497	Micromechanical modelling of porous materials under dynamic loading
C.P. BUCKLEY, J. HARDING, J.P. HOU, C. RUIZ and A. TROJANOWSKI	1517	Deformation of thermosetting resins at impact rates of strain. Part I: Experimental study
P. CERMELLI and M.E. GURTIN	1539	On the characterization of geometrically necessary dislocations in finite plasticity
C. HUET	1569	Comparison and minimum theorems in the time domain for viscoelasticity and other convolutive initial-boundary value problems with applications to random inhomogeneous materials
X. MARKENSCOFF and L. NI	1603	The transient motion of a dislocation with a ramp-like core

Number 8

M. HORI and T. KAMEDA	1621	Inversion of stress from strain without full knowledge of constitutive relations
B.L. ADAMS, A. HENRIE, B. HENRIE, M. LYON, S.R. KALIDINDI and H. GARMESTANI	1639	Microstructure-sensitive design of a compliant beam

G. RENGARAJAN and J.N. REDDY	1665	On the inelastic behavior of crystalline silicon at elevated temperatures
F. DAVÍ and P.M. MARIANO	1701	Evolution of domain walls in ferroelectric solids
G. ROUSSELIER	1727	Dissipation in porous metal plasticity and ductile fracture
V.S. DESHPANDE, N.A. FLECK and M.F. ASHBY	1747	Effective properties of the octet-truss lattice material
C.H. WU	1771	The role of Eshelby stress in composition-generated and stress-assisted diffusion
A.L. ROYTBURD and J. SLUTSKER	1795	Deformation of adaptive materials. Part III: Deformation of crystals with polytwin product phases
S. NEMAT-NASSER, W.-G. GUO and D.P. KIHL	1823	Thermomechanical response of AL-6XN stainless steel over a wide range of strain rates and temperatures

Number 9

60th Anniversary Issue

Special Issue: The J. W. Hutchinson and J. R. Rice

A. NEEDLEMAN	v	Preface
J.W. HUTCHINSON	1847	Delamination of compressed films on curved substrates
J.R. RICE, N. LAPUSTA and K. RANJITH	1865	Rate and state dependent friction and the stability of sliding between elastically deformable solids
J. KNAP and M. ORTIZ	1899	An analysis of the quasicontinuum method
L.B. FREUND and H.T. JOHNSON	1925	Influence of strain on functional characteristics of nanoelectronic devices
W. LU and Z. SUO	1937	Dynamics of nanoscale pattern formation of an epitaxial monolayer
K. HARDIKAR, V. SHENOY and R. PHILLIPS	1951	Reconciliation of atomic-level and continuum notions concerning the interaction of dislocations and obstacles
C. LEMARCHAND, B. DEVINCRE and L.P. KUBIN	1969	Homogenization method for a discrete-continuum simulation of dislocation dynamics

J.L. BASSANI	1983	Incompatibility and a simple gradient theory of plasticity
R. SAHA, Z. XUE, Y. HUANG and W.D. NIX	1997	Indentation of a soft metal film on a hard substrate: strain gradient hardening effects
N.A. FLECK, O.B. OLURIN, C. CHEN and M.F. ASHBY	2015	The effect of hole size upon the strength of metallic and polymeric foams
P.R. HEYLIGER and R.M. MCMEEKING	2031	Cold plastic compaction of powders by a network model
R. HILL	2055	On the mechanics of localized necking in anisotropic sheet metals
T.J. LU, J.W. HUTCHINSON and A.G. EVANS	2071	Optimal design of a flexural actuator
F.F. ABRAHAM	2095	The atomic dynamics of fracture
H. GAO, Y. HUANG and F.F. ABRAHAM	2113	Continuum and atomistic studies of intersonic crack propagation
E. VAN DER GIESSEN, V.S. DESHPANDE, H.H.M. CLEVERINGA and A. NEEDLEMAN	2133	Discrete dislocation plasticity and crack tip fields in single crystals
W.J. DRUGAN	2155	Asymptotic solutions for tensile crack tip fields without kink-type shear bands in elastic-ideally plastic single crystals
J.R. WILLIS and A.B. MOVCHAN	2177	The influence of viscoelasticity on crack front waves
V. TVERGAARD	2191	Crack growth predictions by cohesive zone model for ductile fracture
Y. BEN-ZION	2209	Dynamic ruptures in recent models of earthquake faults

Number 10

N.A. FLECK and J.W. HUTCHINSON	2245	A reformulation of strain gradient plasticity
G.E. OLEAGA	2273	Remarks on a basic law for dynamic crack propagation
K.V. POCHIRAJU, G.P. TANDON and N.J. PAGANO	2307	Analyses of single fiber pushout considering interfacial friction and adhesion

S.K. KANAUN and D. JEULIN 2339 Elastic properties of hybrid composites by the effective field approach

B.K. HENDERSON, K.I. MASLOV and V.K. KINRA 2369 Experimental investigation of acoustic band structures in tetragonal periodic particulate composite structures

J. GHOUSSOUB and Y.M. LEROY 2385 Solid—fluid phase transformation within grain boundaries during compaction by pressure solution

W. YANG, J.-C. TANG, Y.-S. ING and C.-C. MA 2431 Transient dislocation emission from a crack tip

Number 11

Special Issue: The Jean-Paul Boehler Memorial Volume

A.J.M. SPENCER and Q.-S. ZHENG 2455 Jean-Paul Boehler 1942–1998

T. BÖHLKE and A. BERTRAM 2459 Isotropic orientation distributions of cubic crystals

P. CHADWICK, M. VIANELLO and S.C. COWIN 2471 A new proof that the number of linear elastic symmetries is eight

Y.F. DAFALIAS 2493 Orientation distribution function in non-affine rotations

G.J. DVORAK and J. ZHANG 2517 Transformation field analysis of damage evolution in composite materials

F. ELLYIN and Z. XIA 2543 Rate-dependent constitutive modelling and micro-mechanical analysis of fibre-reinforced metal–matrix composites

Q.-C. HE 2557 Effects of size and boundary conditions on the yield strength of heterogeneous materials

H.P. TROUNG QUI and H. LIPPMANN 2577 On the impact of local rotation on the evolution of an anisotropic plastic yield condition

B. LORET, E. RIZZI and Z. ZERFA 2593 Relations between drained and undrained moduli in anisotropic poroelasticity

K.Z. MARKOV 2621 Justification of an effective field method in elasto-statics of heterogeneous solids

S. NEMAT-NASSER and L. NI	2635	A fiber-bridged crack with rate-dependent bridging forces
J. RYCHLEWSKI	2651	Elastic waves under unusual anisotropy
A.J.M. SPENCER	2667	A theory of viscoplasticity for fabric-reinforced composites
V. TVERGAARD	2689	Resistance curves for mixed mode interface crack growth between dissimilar elastic–plastic solids
R. LUCIANO and J.R. WILLIS	2705	Non-local effective relations for fibre-reinforced composites loaded by configuration-dependent body forces
W. YANG and M.-X. CHEN	2719	Modeling of large plastic deformation in crystalline polymers
M. BORNERT, R. MASSON, P. PONTE CASTAÑEDA and A. ZAOUI	2737	Second-order estimates for the effective behaviour of viscoplastic polycrystalline materials
Q.-S. ZHENG and D.-X. DU	2765	An explicit and universally applicable estimate for the effective properties of multiphase composites which accounts for inclusion distribution

Number 12

I. JEON and S. IM	2789	The role of higher order eigenfields in elastic–plastic cracks
W.C. CRONE and T.W. SHIELD	2819	Experimental study of the deformation near a notch tip in copper and copper–beryllium single crystals
L.I. SLEPYAN	2839	Feeding and dissipative waves in fracture and phase transition. III. Triangular-cell lattice
L. BORCEA and O. BRUNO	2877	On the magneto-elastic properties of elastomer–ferromagnet composites
F. MA, M.A. SUTTON and X. DENG	2921	Plane strain mixed mode crack-tip stress fields characterized by a triaxial stress parameter and a plastic deformation extent based characteristic length
	III	Contents of volume 49
	XIII	Author Index of volume 49
